REPORT ON WEEKEND NASHVILLE TOUR:

Submitted by Roy Armstrong

On Thursday April 11, 2019 at 8:00 AM, **Roy Armstrong, Charlie & Susan Armstrong, Moise Napier, and Fred Shelton** met at the CVS Drug store in Shepherdsville. Forty-five minutes later we met **Jim Norris** at the gas station at highway 251 & Battle Training Rd. From there we went to Elizabethtown, got on Highway 31W. We stopped at the McDonalds in Munfordville where we met **Roger, Cherryl and Erick Goodman**. From there we went to Chaney's Red Barn in Bowling Green where we met **Jeff and**

Janet Everly, Vince and Irene Nealen and Carl and Carolyn Ford.

At this point we had a total of 15 members and 8 Model A's. on this tour. After lunch at Chaney's Red Barn we went to **Bill Stipe Machine Co. Inc.** located in Auburn KY. He also owns Specialty Motor Cams in Plymouth, Wisconsin. He showed us how cams are made. He makes other Model A and Model T parts. It was a very interesting visit. You can meet Bill on the Ford Garage web site.

NASHVILLE TOUR REPORT continued:

After this the **Goodman's** had to go back home and the rest of us went to our motel in Nashville. On Friday, we left our Model A's at the motel and caught a shuttle bus to take us downtown Nashville. There we took the trolley for the day. You could get on and off a trolley every 30 minutes all day. Each person got to see what was interesting to them. Then on Saturday we had planned to go to the Pickers place and the Lane Car Museum and go to the Andrew Jackson home. On Sunday we had planned to head for home. However, the weather forecast for Sunday was severe thunderstorms with high wind so we decided that it might be better to go to the Lane Car Museum Saturday morning and then head home. The Lane Car Museum has 550 cars in it. It is not an American car museum. I only saw about 3 or 4 American cars in the whole museum. The cars in the museum are from all over the world. A tour guide took us through one part of the museum and explained some of the cars to us and answered any questions that we may have. The rest of the museum we could see and read about the cars. We got to park our Model A's in their garage while visiting the museum.

We didn't get home without problems. One car had to be pulled to get it started several times until we discovered that the fuse at the starter was so loose that it wasn't making contact. The rear radius rod got bent or broken on another car and had to be hauled home on a tow truck. One car had to come home with no head lights; however, found the light switch wasn't making contact. Even with the car trouble and the threat of severe thunderstorms it was a great tour. We all really enjoyed our time in Nashville. I put another 446 miles on the truck.
